

Insurance Plans *

Different medical benefits are provided by a given insurance company depending on the patient's specific **insurance plan**. The type of plan (Indemnity, **POS, PPO, HMO**), as indicated on the insurance card, determines the level of coverage, as well as whether our services are considered in-network or out-of-network. The plan may also require that the referring physician obtain **pre-authorization** or **referral forms** in order for us to perform certain examinations.

If you have questions regarding **pre-authorization** requirements please feel free to ask at the time of scheduling.
